

# Gateway with reMARK

Gateway is a component of reMARK that is complementary to your service that allows you to run a reMARK client on an individual PC and connect into the backend no matter where you are located.

## Benefits of Gateway

More deployment options

Allows client to be further from server

Works over the internet

## Features Released with Gateway

Azure AD SSO support

More caching options, enables Offline Mode (Coming Q4 2023)

Open API

## 3 Scenarios for Gateway

**Scenario 1** — Allows you to scale down or move away from VDIs like Citrix or Remote Desktop Services. We support side by side deployment.

**Scenario 2** — Moves servers to the cloud, allowing you to take advantage of the flexibility offered by the cloud.

**Scenario 3** — Moves away from Remote Sync to enable better collaboration amongst teams and simplify your infrastructure.

## Gateway Connection
