THE reMARK SOLUTION

reMARK's comprehensive email dashboard is designed specifically for the maritime shipping industry. With the ability to strengthen collaboration and workflows, reMARK boasts a powerful set of features such as unique filtering, filing, and search capabilities. Fully operational with mobile devices, reMARK's app supports iOS and Android so you stay connected with your team any time, anywhere.

Rich Capabilities within
the reMARK App**

Emails Always Available

Emails Always Available

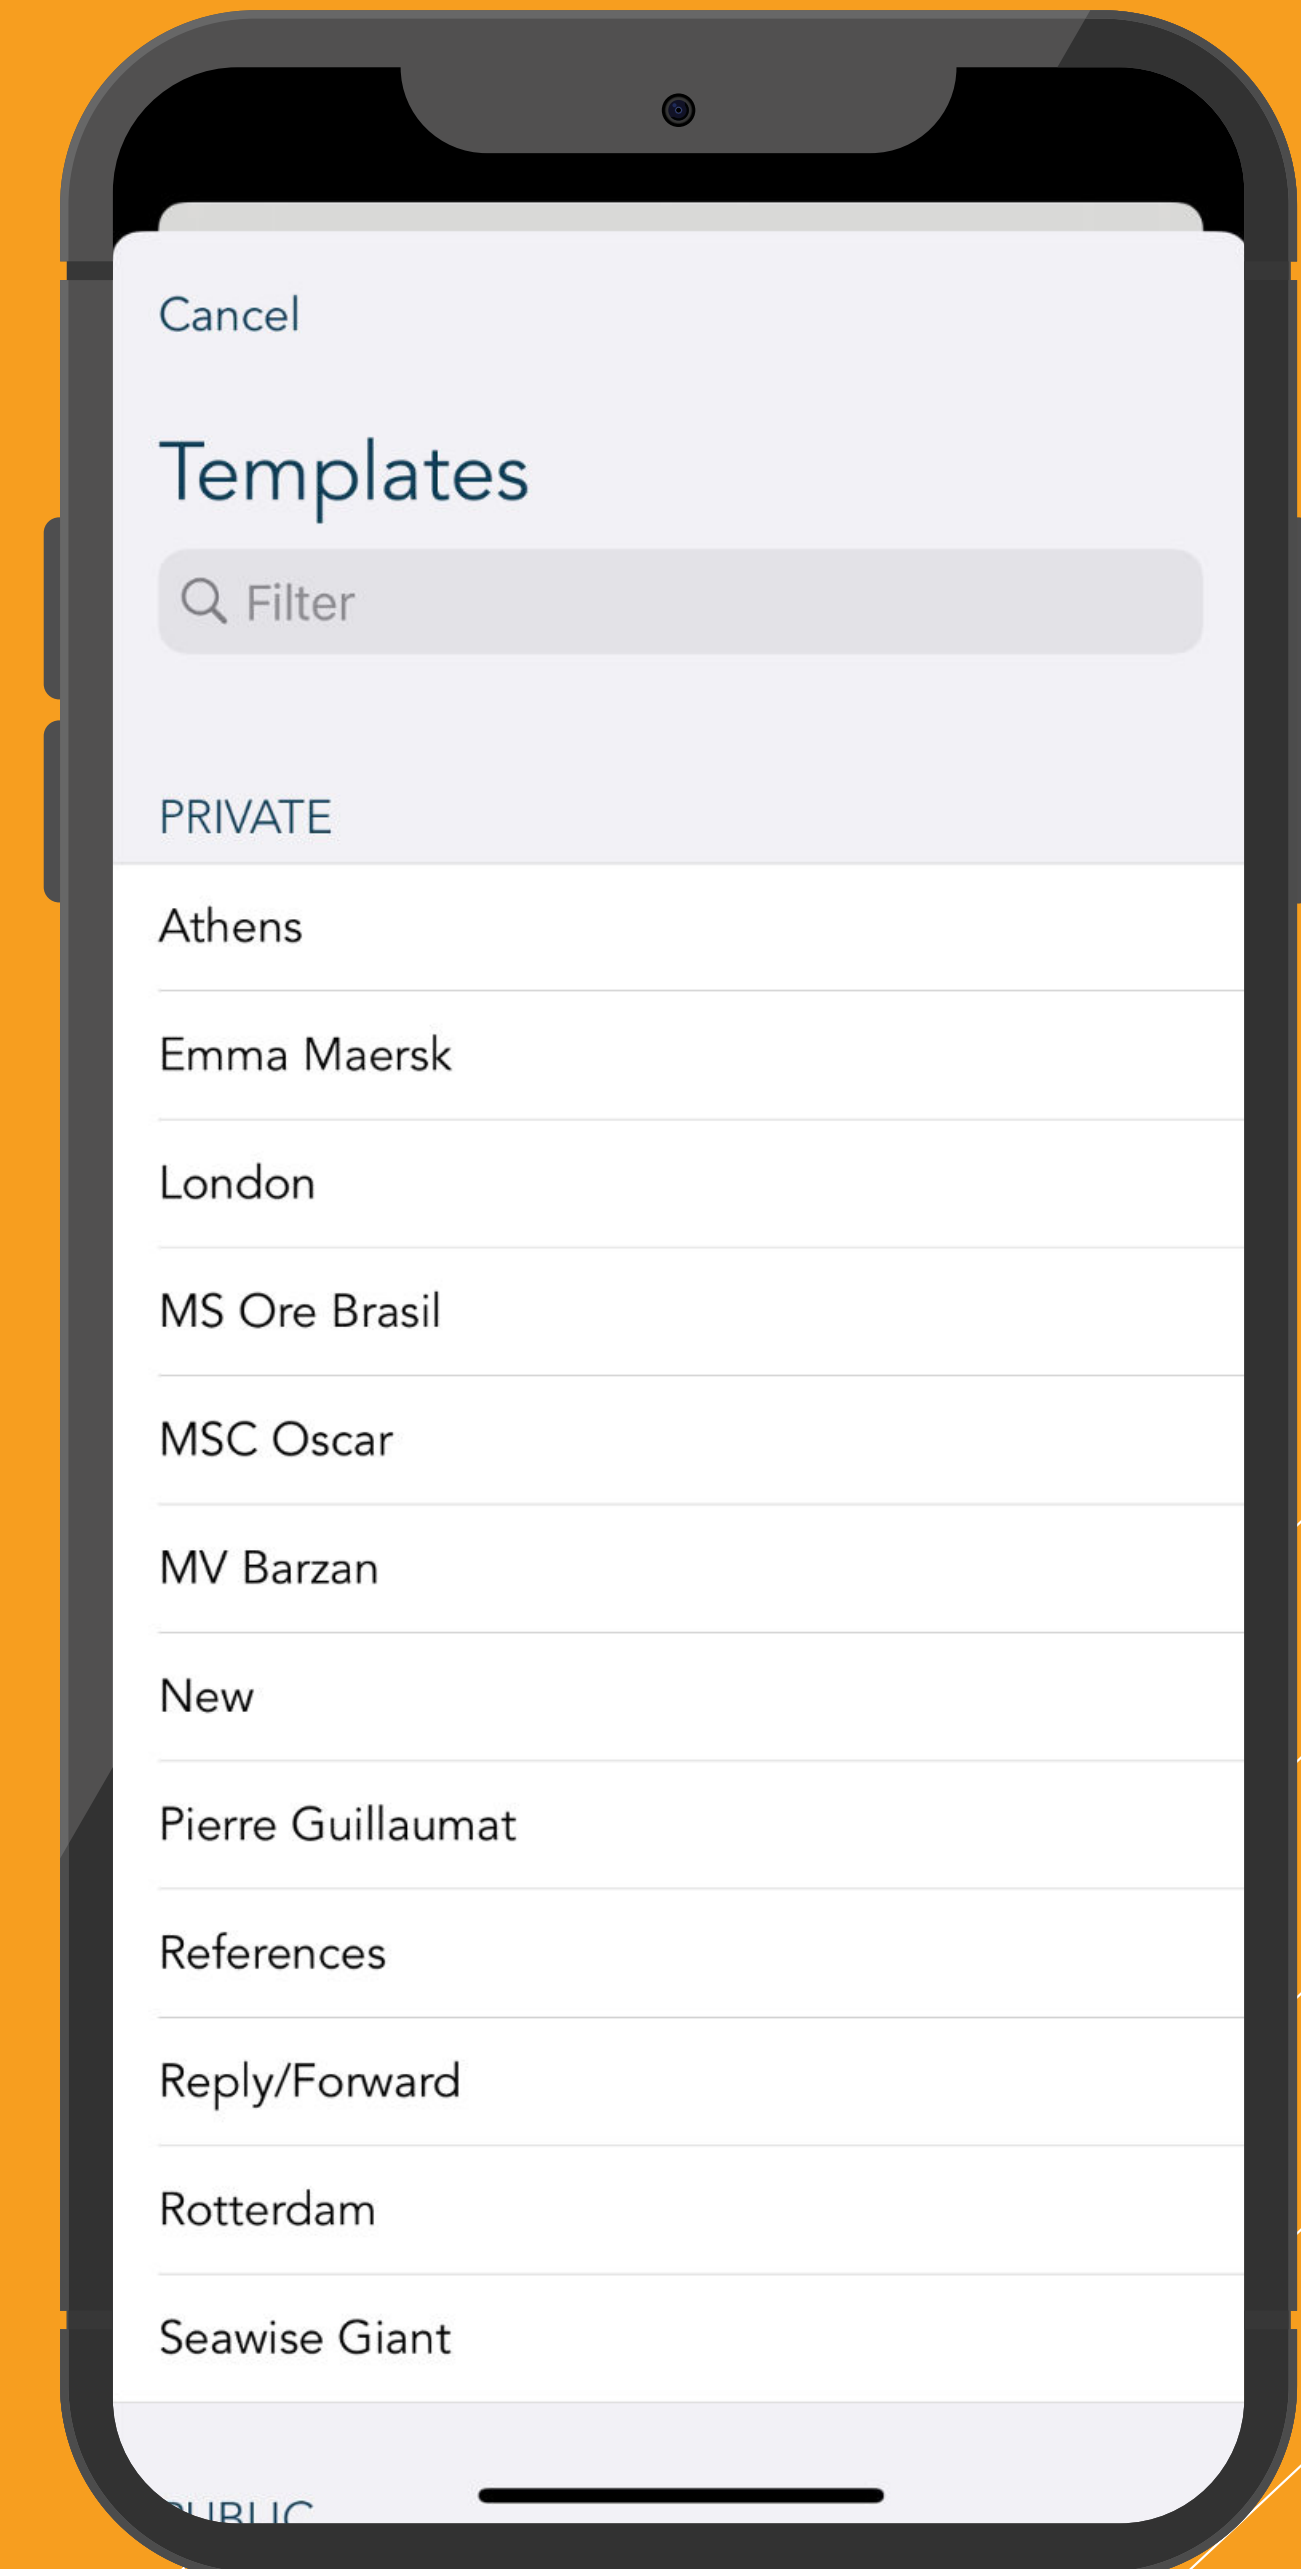

Continue working offline with the reMARK app's Sync feature. Store the most recent emails from selected folders and inboxes for speedy access to your most important emails.

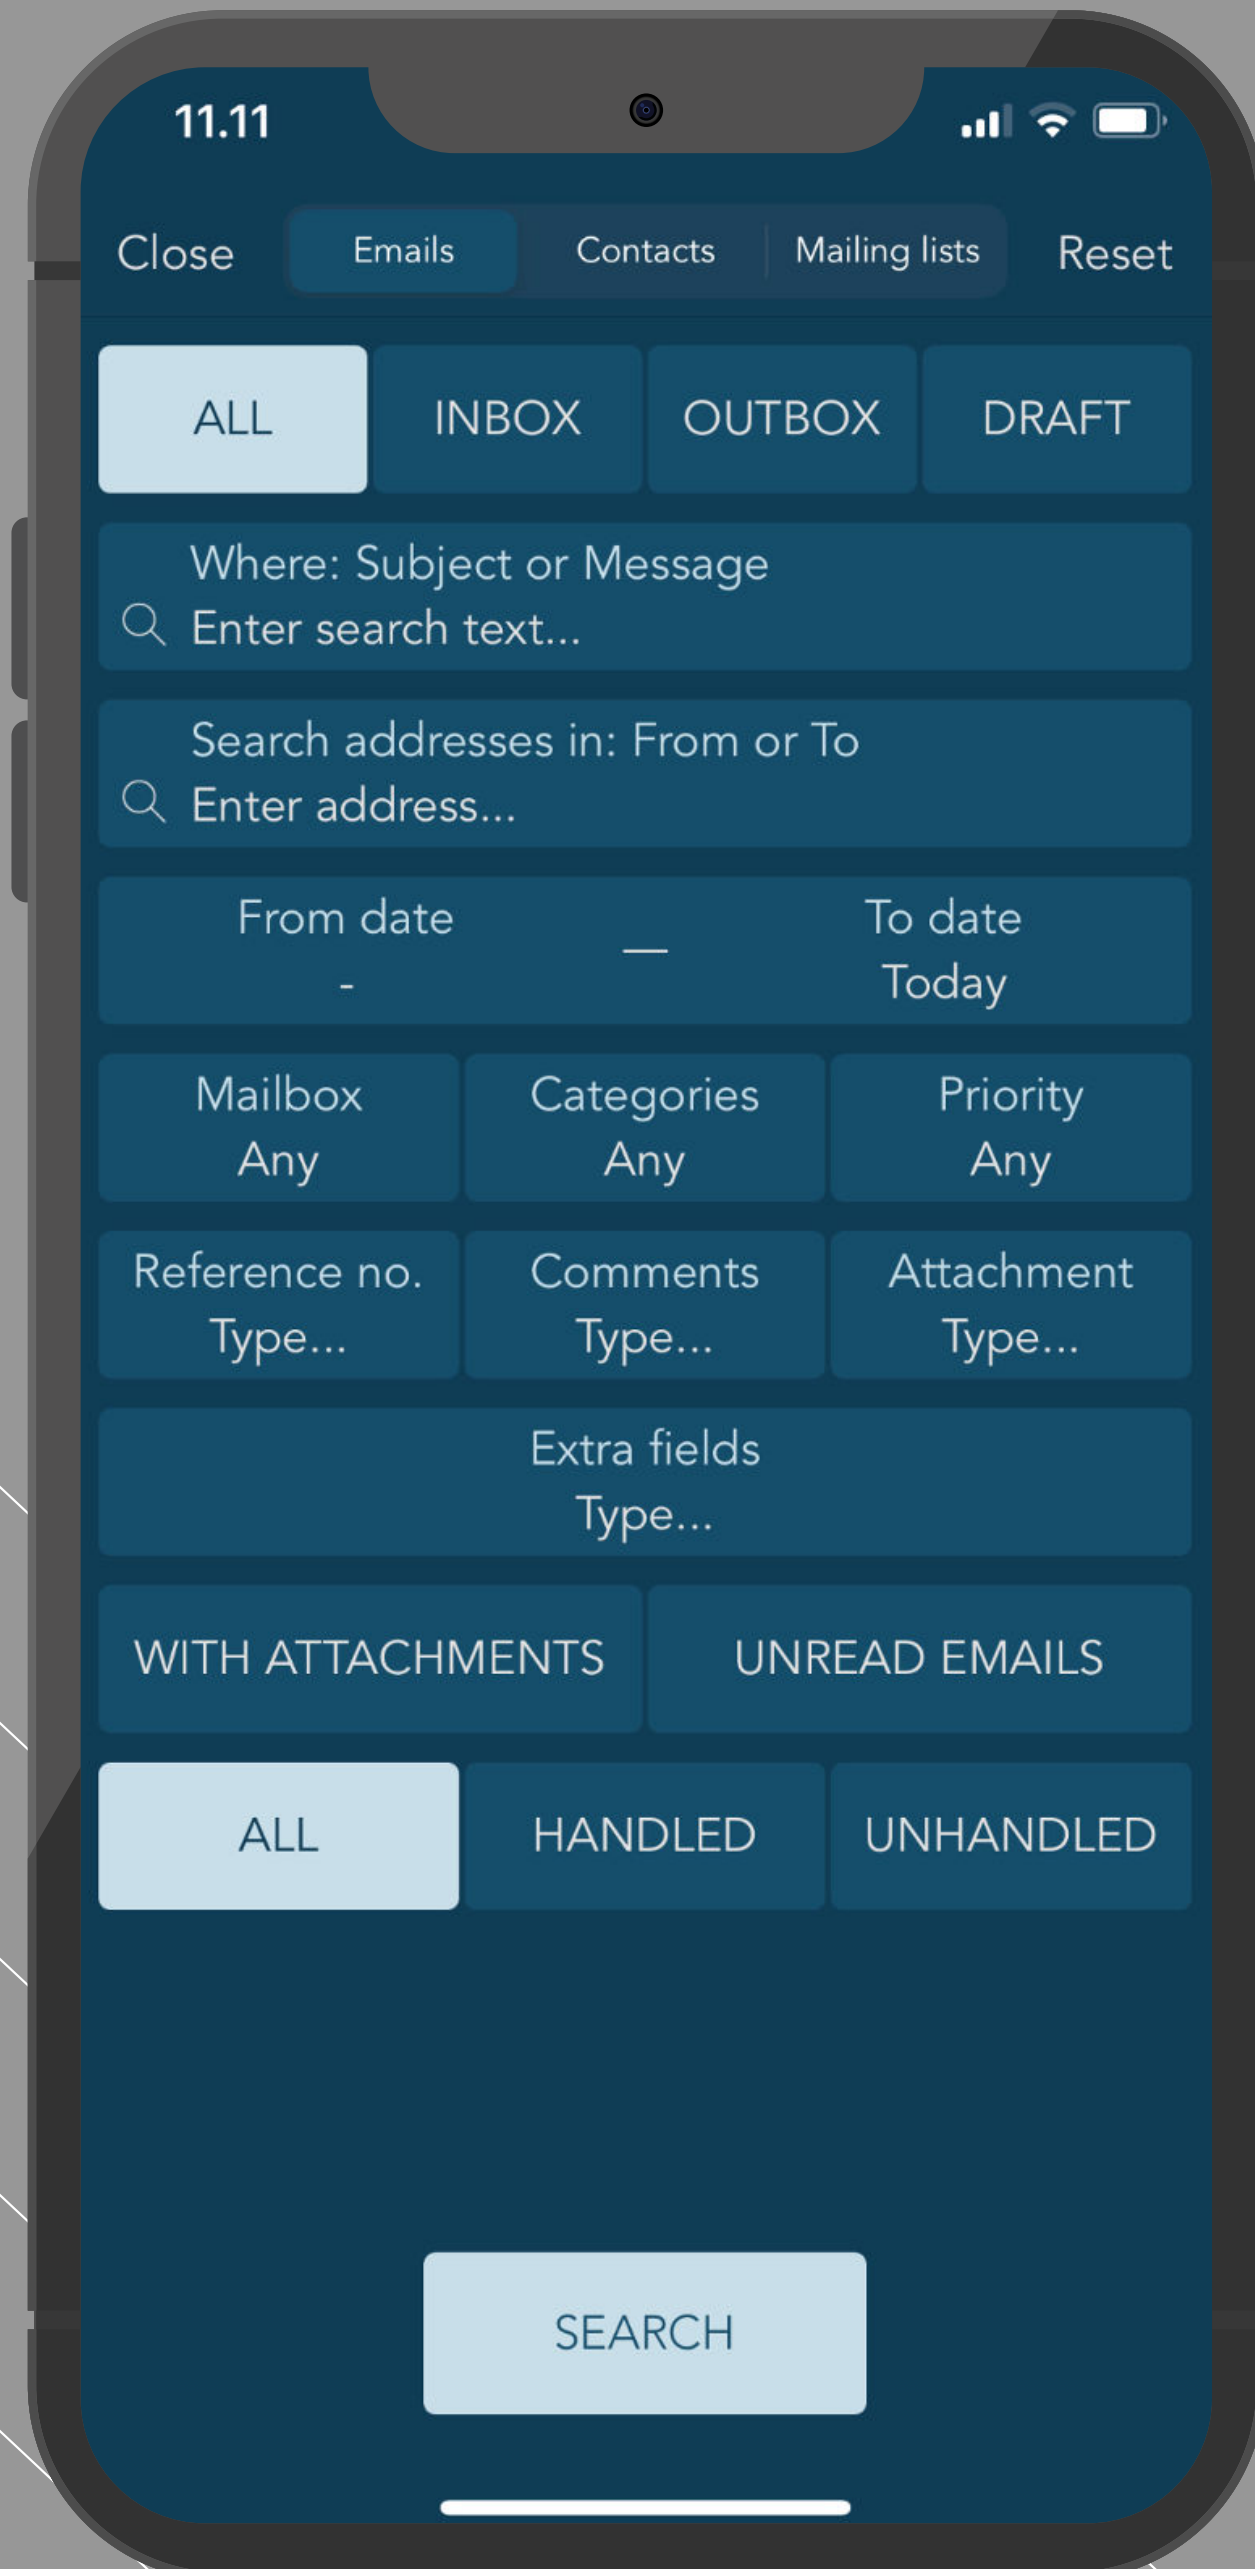

Templates

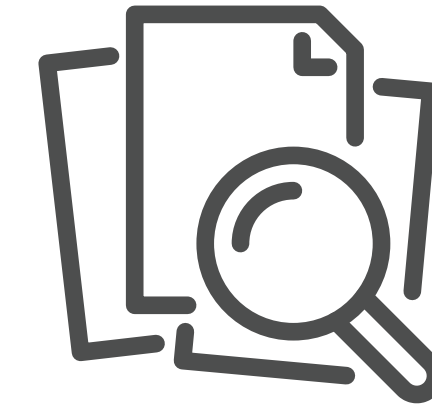

reMARK's templates feature allows for greater flexibility and convenience when crafting email responses. Templates eliminate the need to start from scratch with every response, while drastically reducing the time it takes to compose emails. Users enjoy more streamlined document management and improved response rates with templates.

Templates

Search Function

Search Function

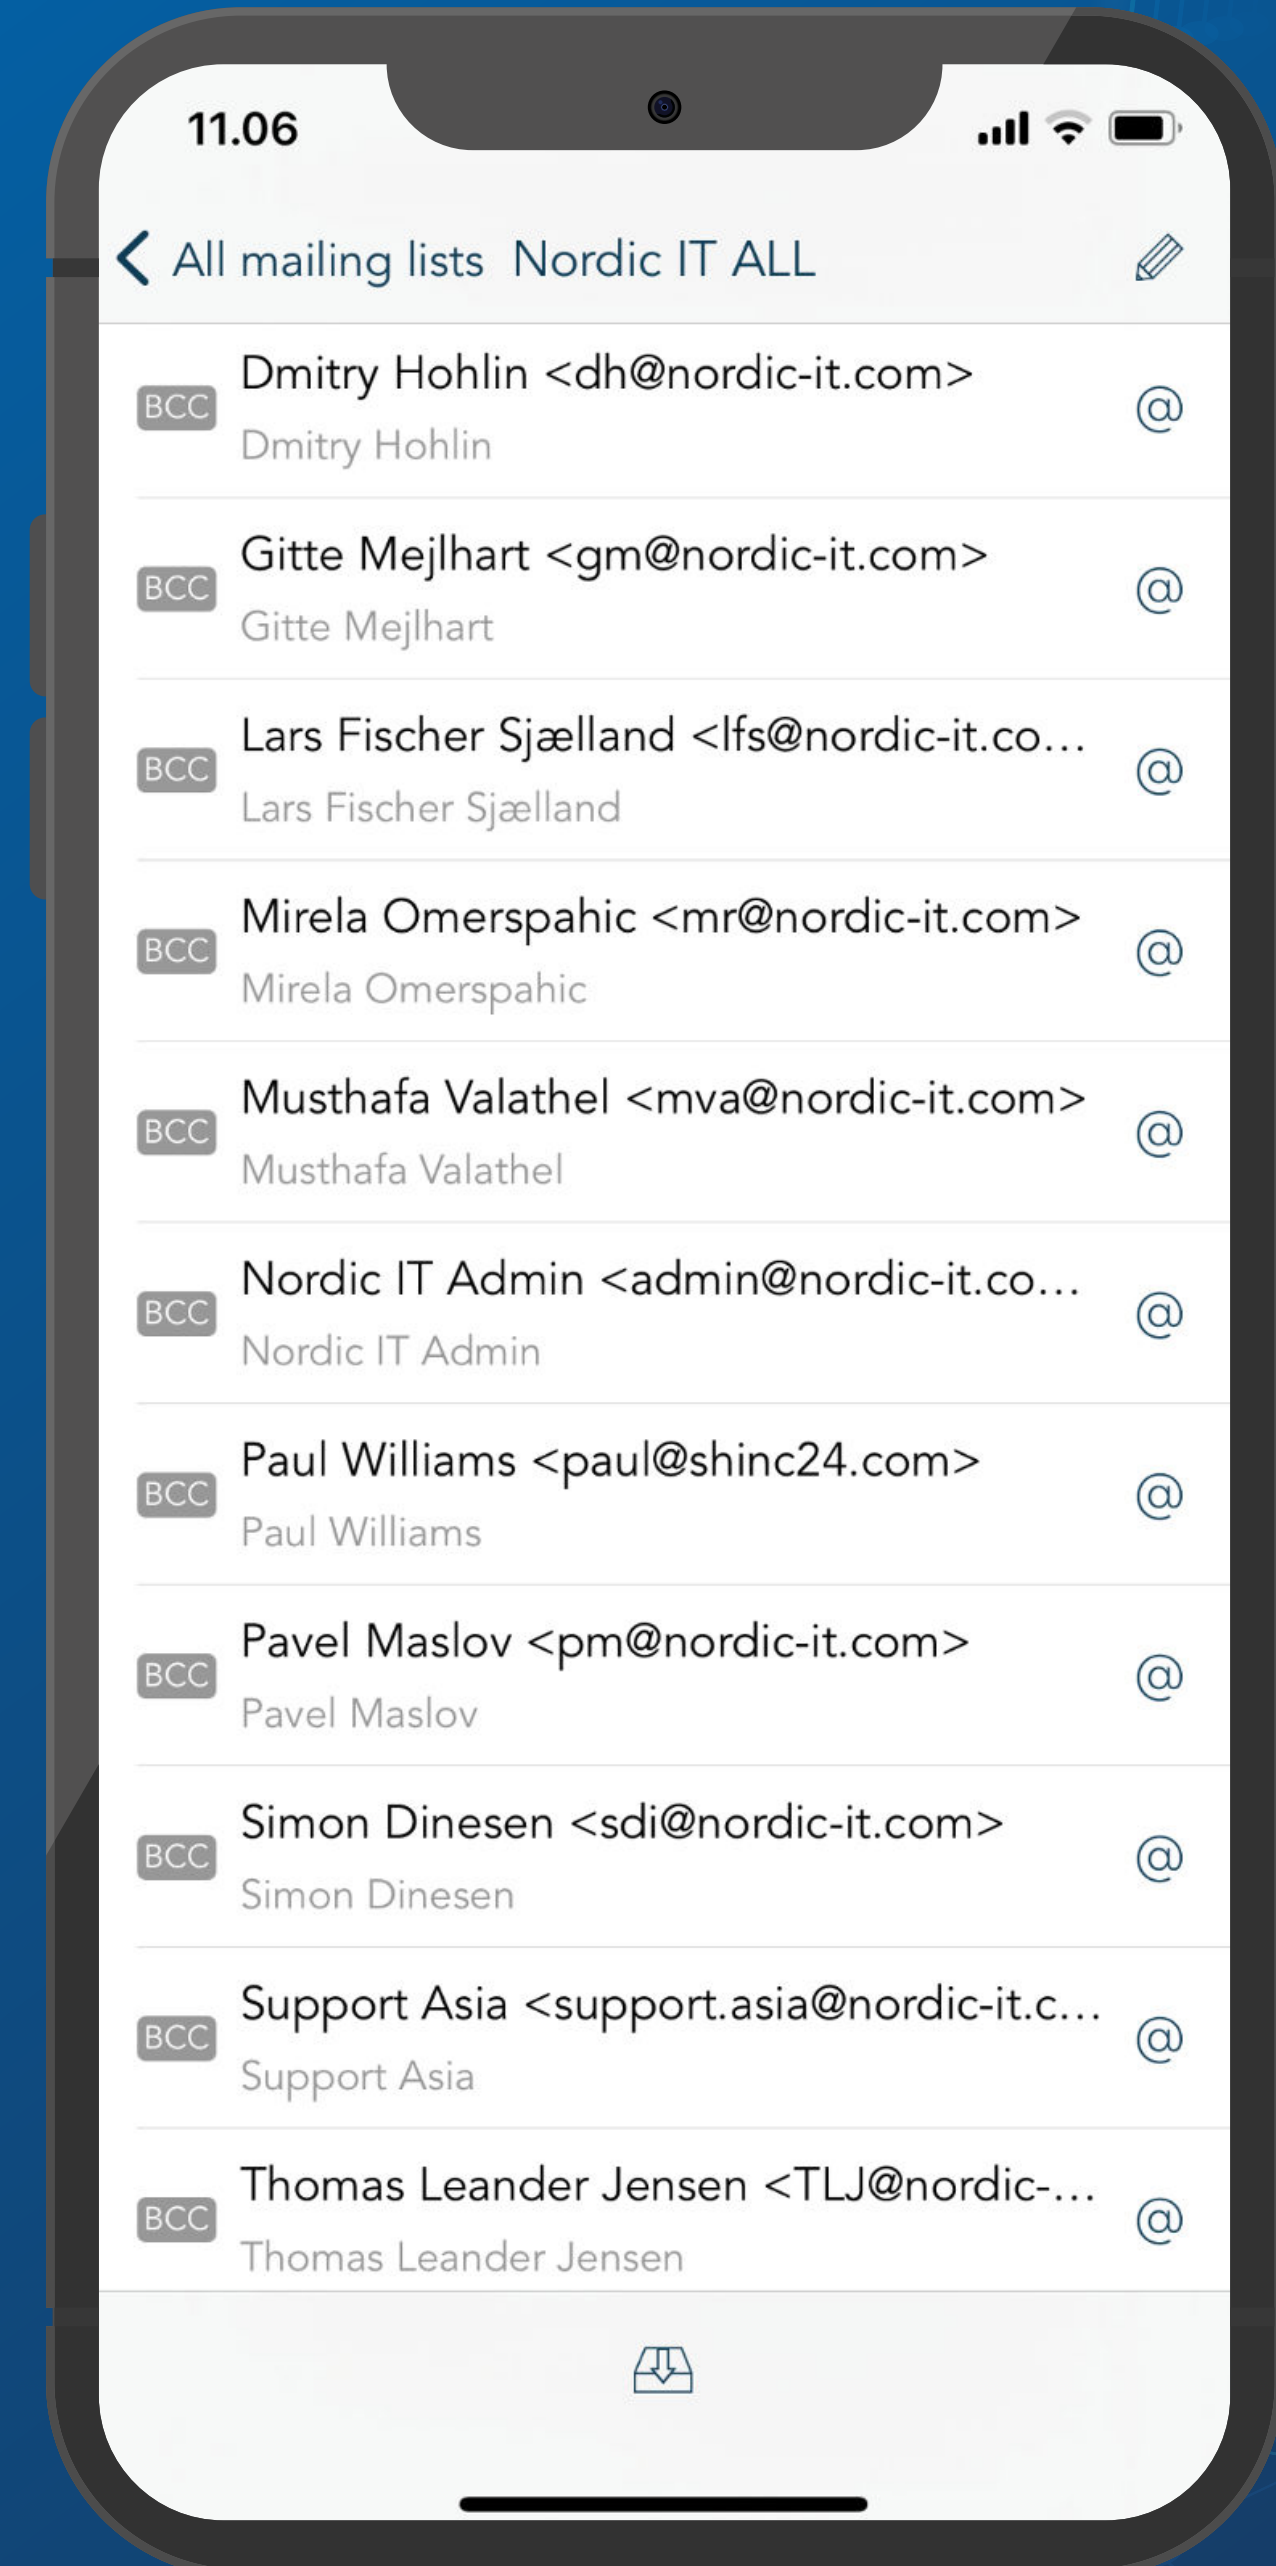

reMARK eliminates the tedious task of searching through endless emails and attachments. The search function allows for quick retrieval of important information via keyword search, dating as far back to the first email you've ever received. The reMARK app uses the same engine as the desktop version, allowing for greater speed and agility.

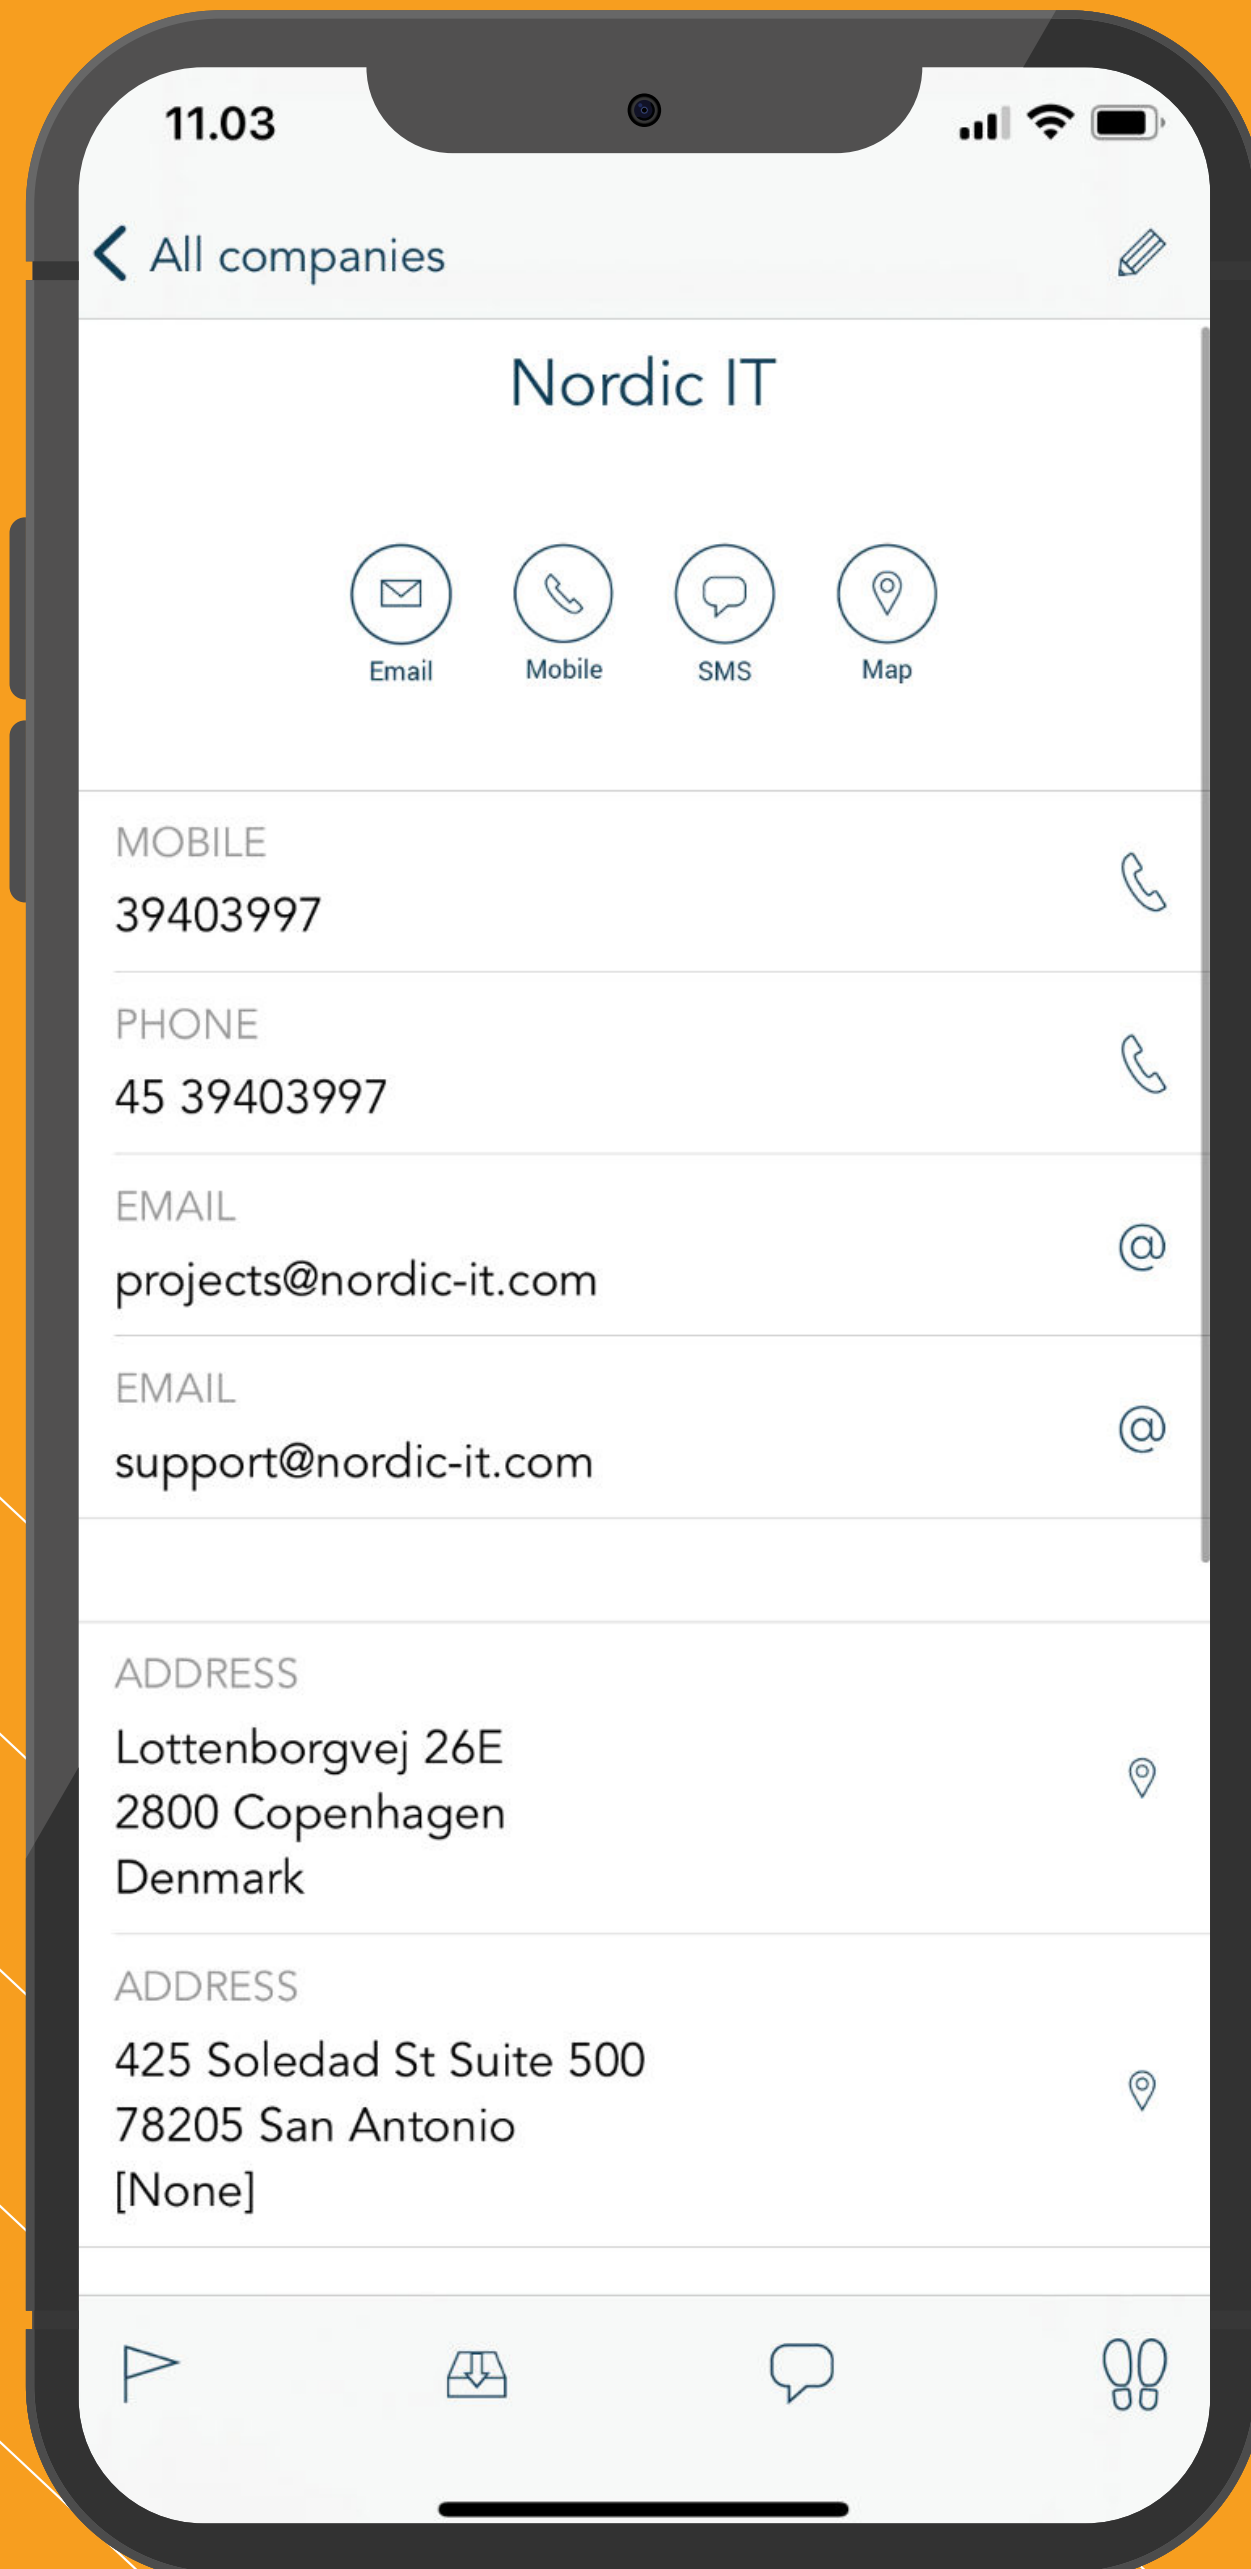

Mailing Lists

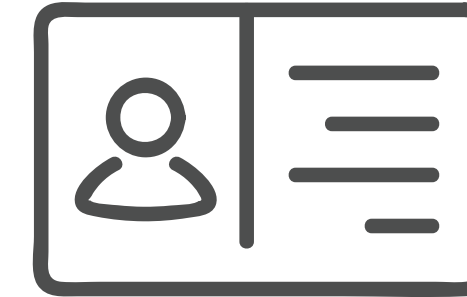

Send your circulars using the mailing list feature even when you do not have access to a computer. Users can set up customized mailing lists with preset groups of contacts, and even set specific mailing lists as one of your “Favorites” for easy access.

Mailing Lists

Contacts

Contacts

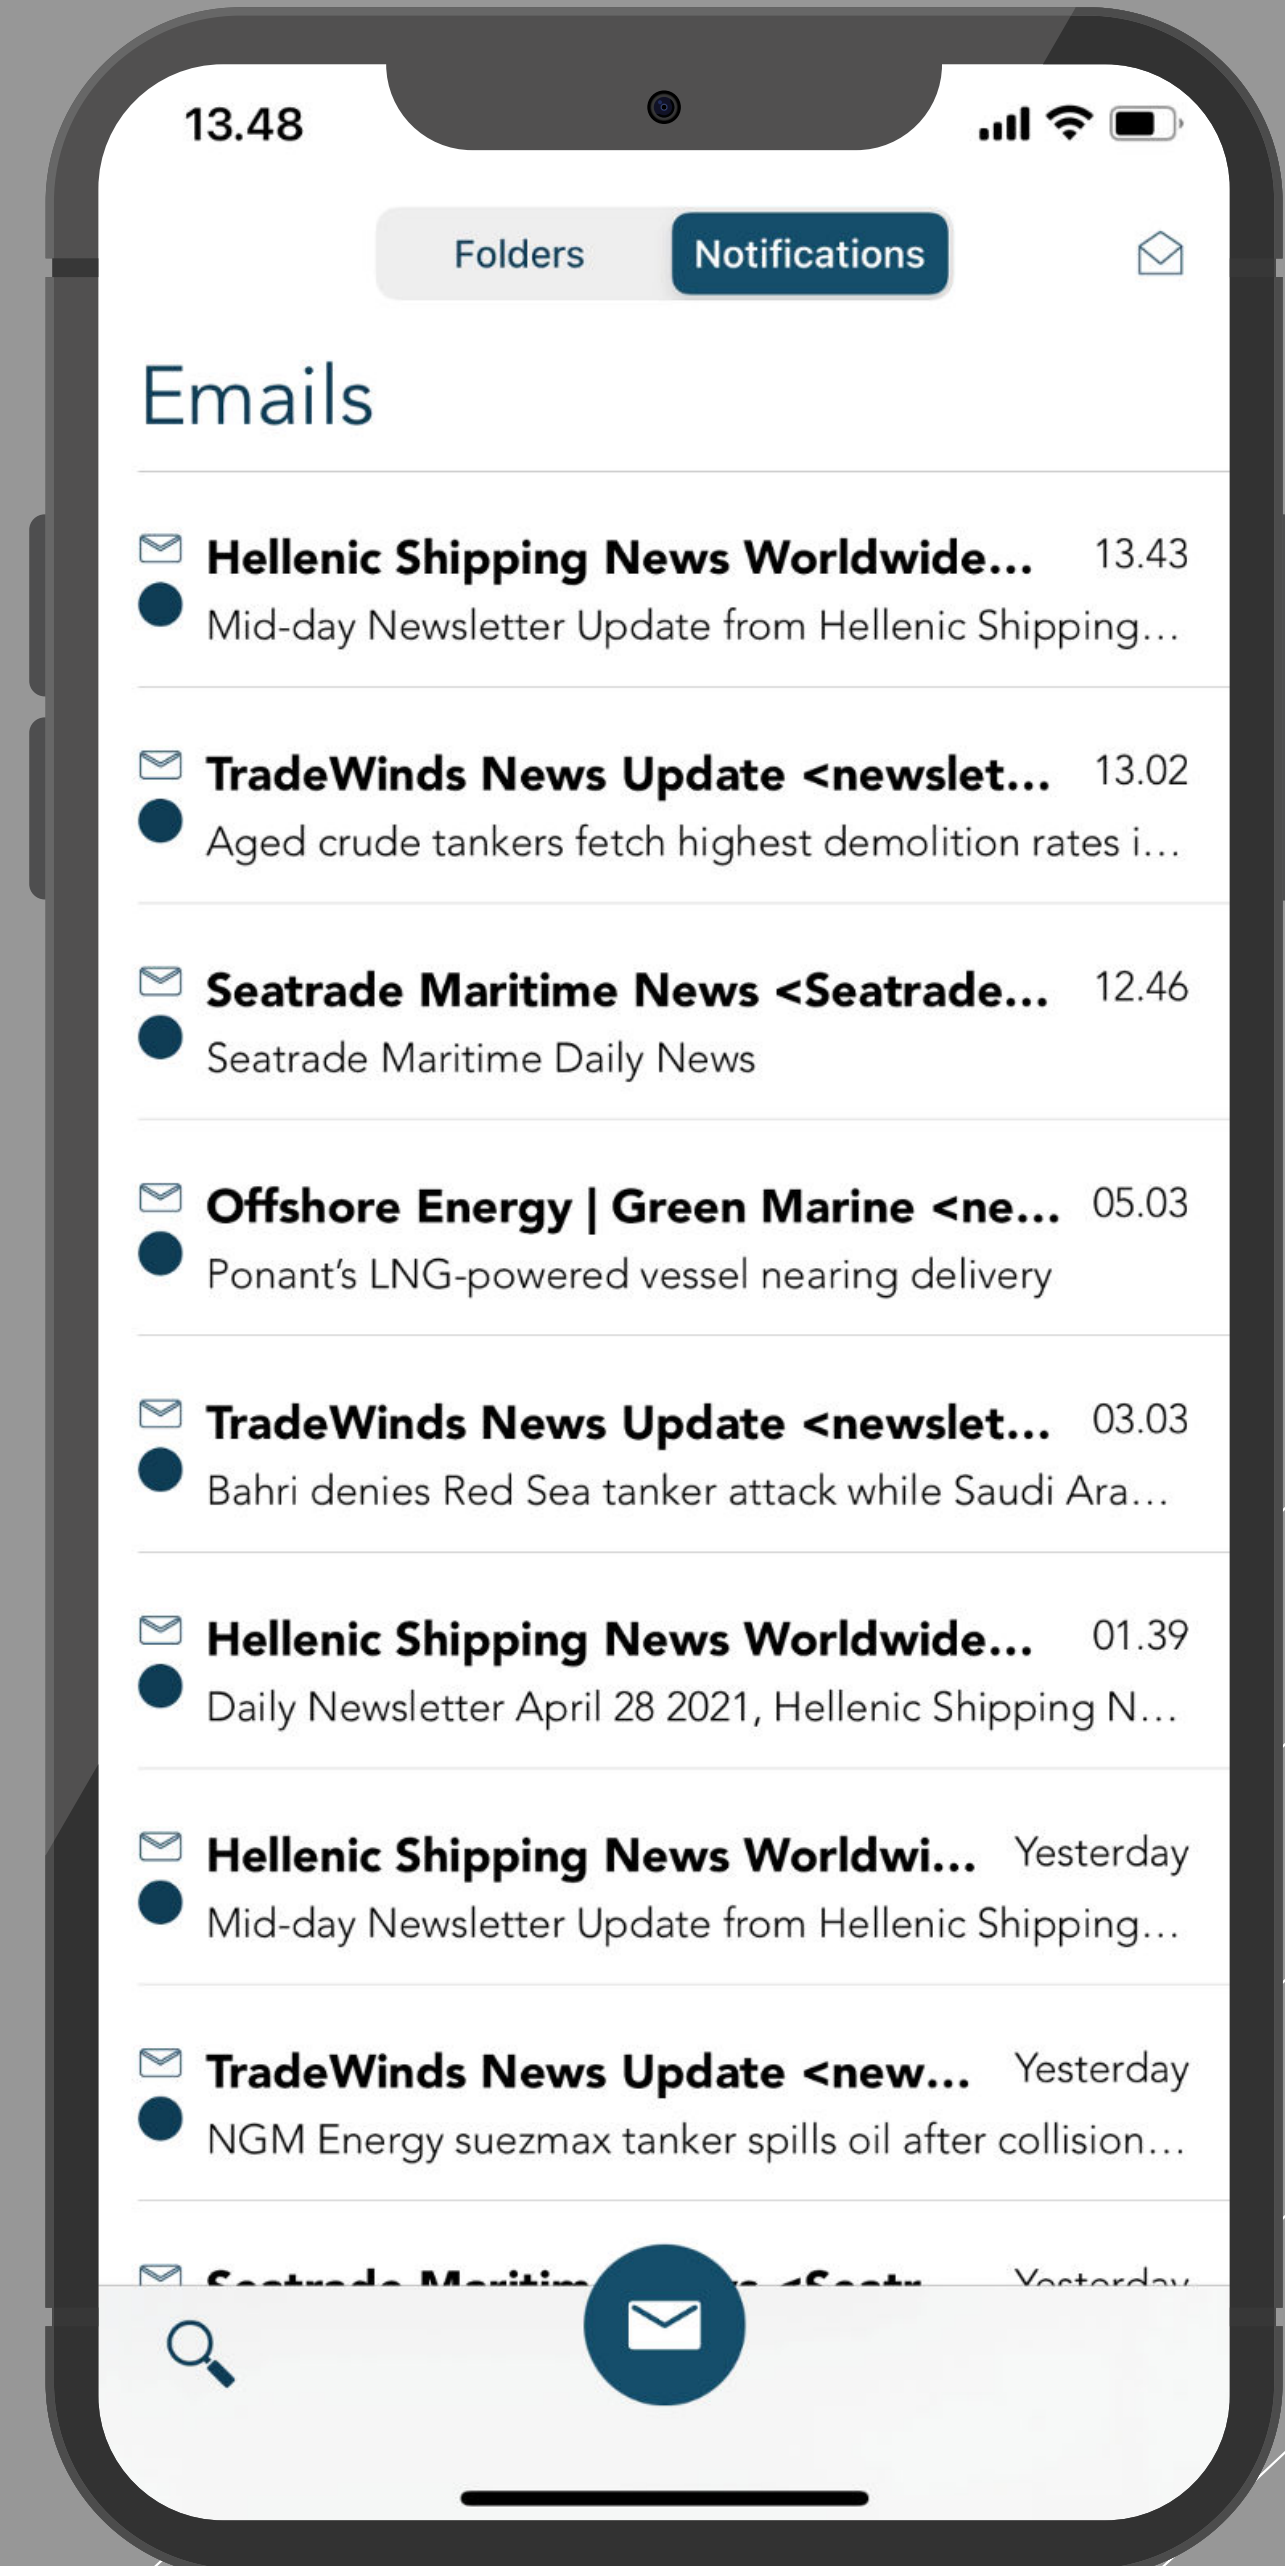

Get in touch with one of your contacts on-the-go when you set up shared and private contact lists within the reMARK mobile app. All the contacts you usually use on the desktop version will also be available on your mobile. You can even set up the phone to recognize incoming phone calls from contacts in reMARK, so you always know who is calling.

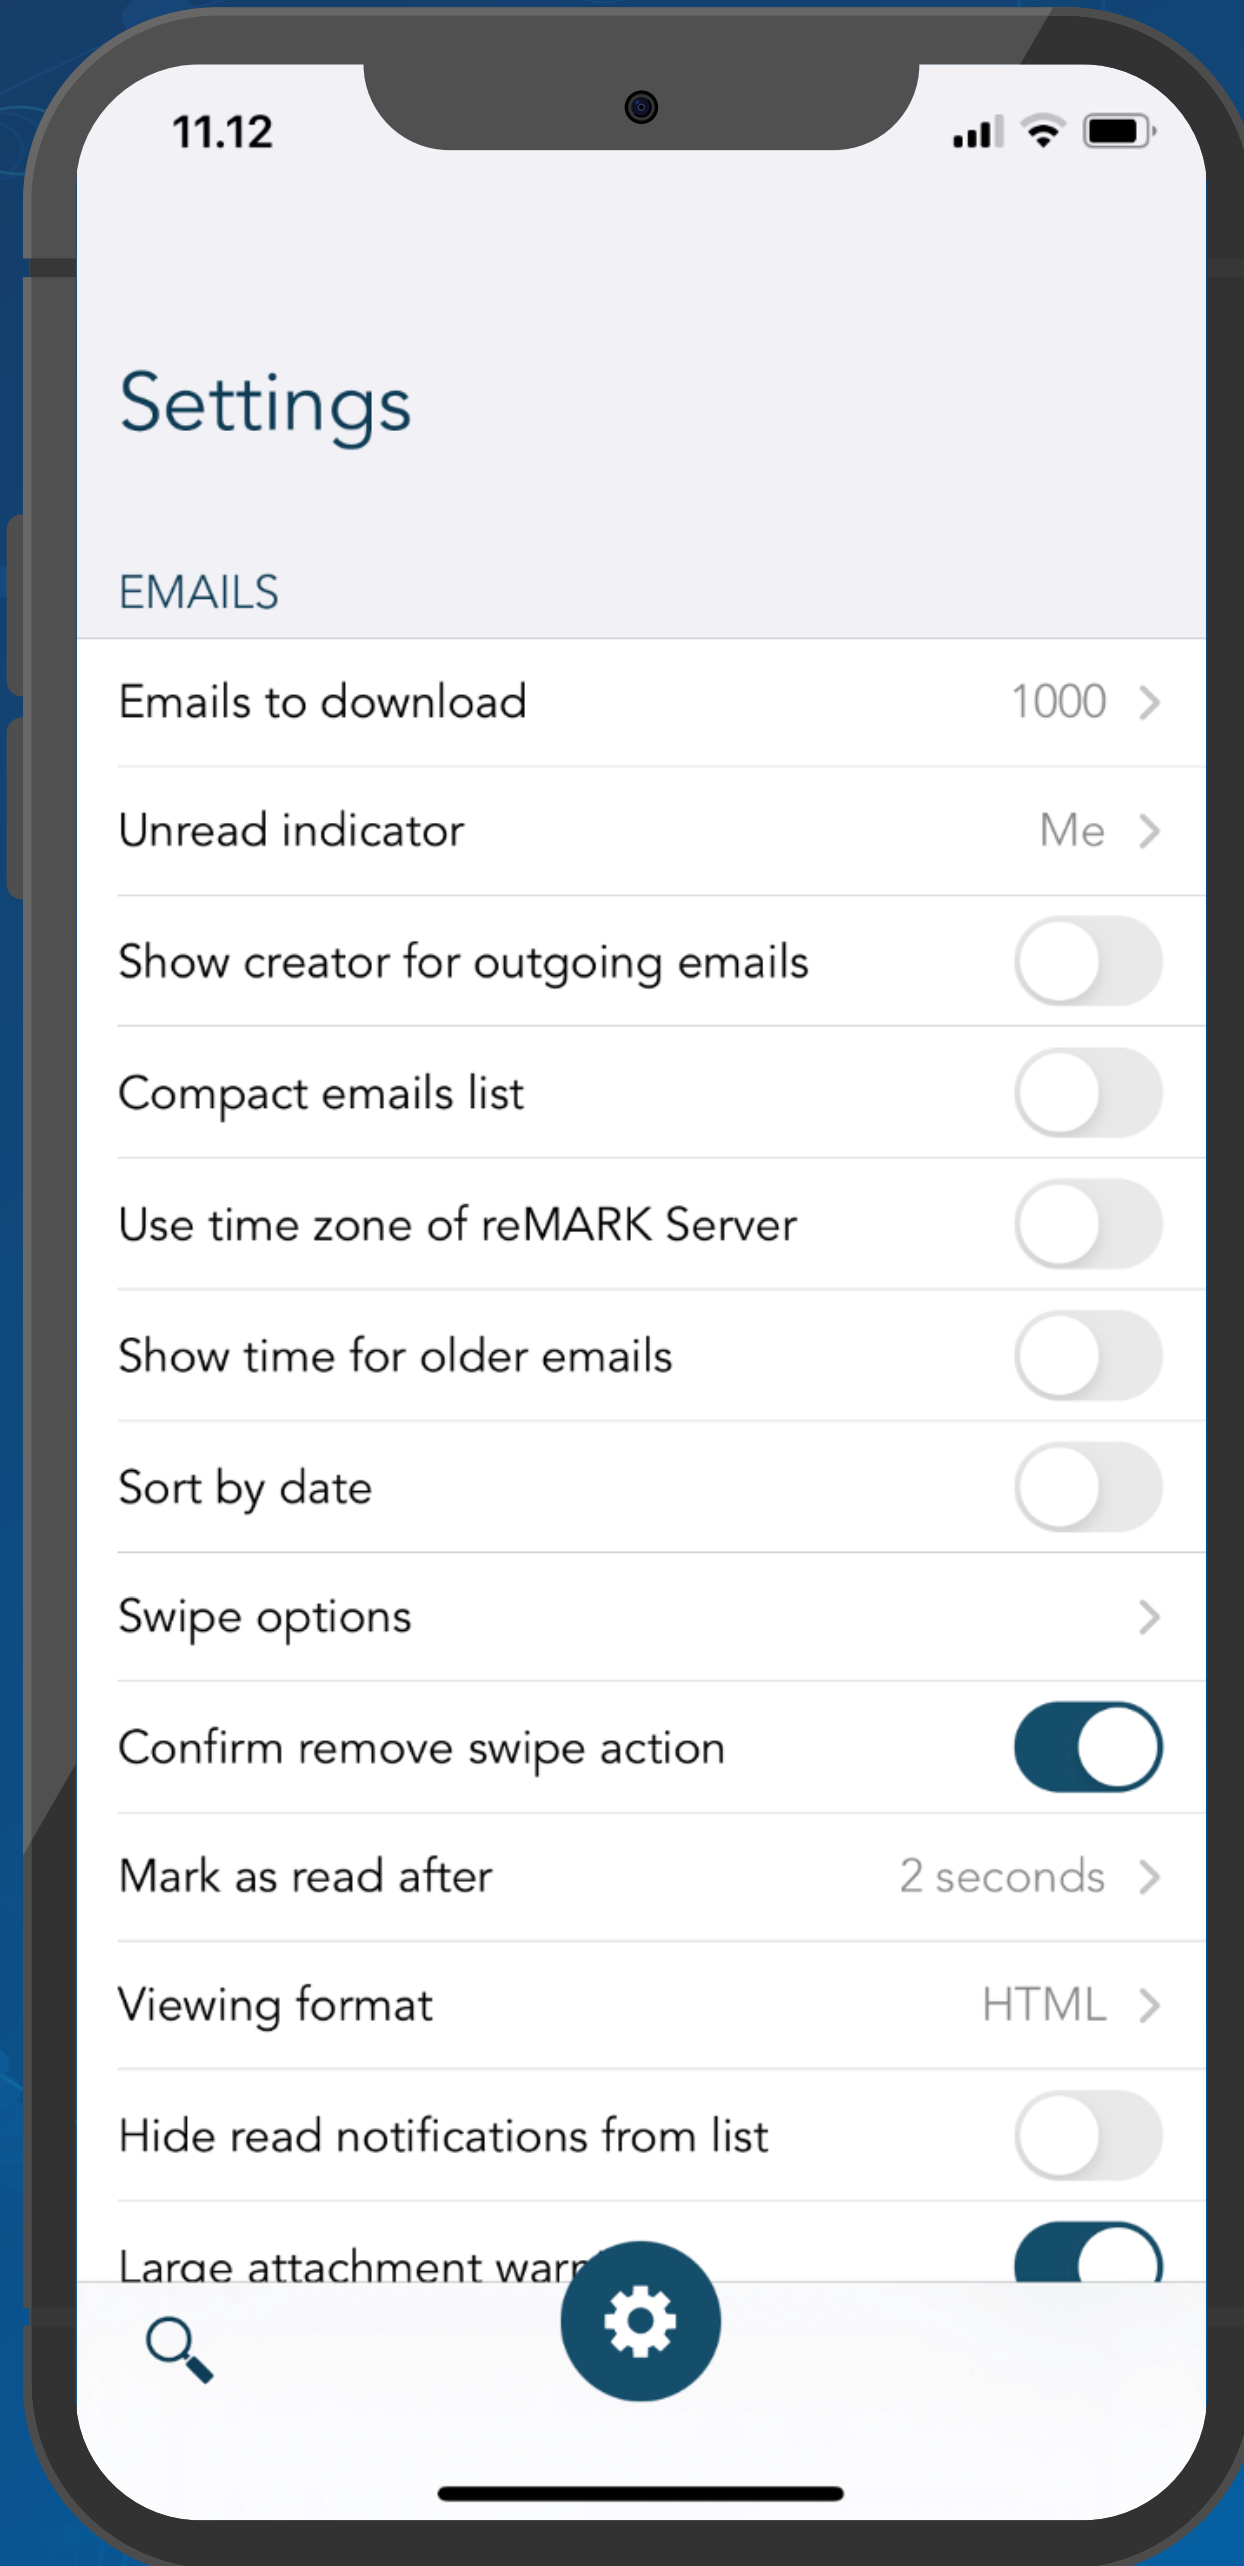

Notifications

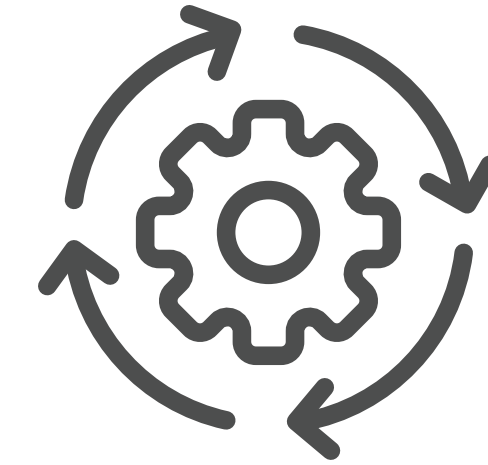

reMARK's user-defined notifications allow for full control over the number of notifications a user receives each day. Users can select specific folders and inboxes that send push notifications to their phone. This way, users only get the most important and relevant notifications sent to their mobile device.

Notifications

Workflows

Workflows

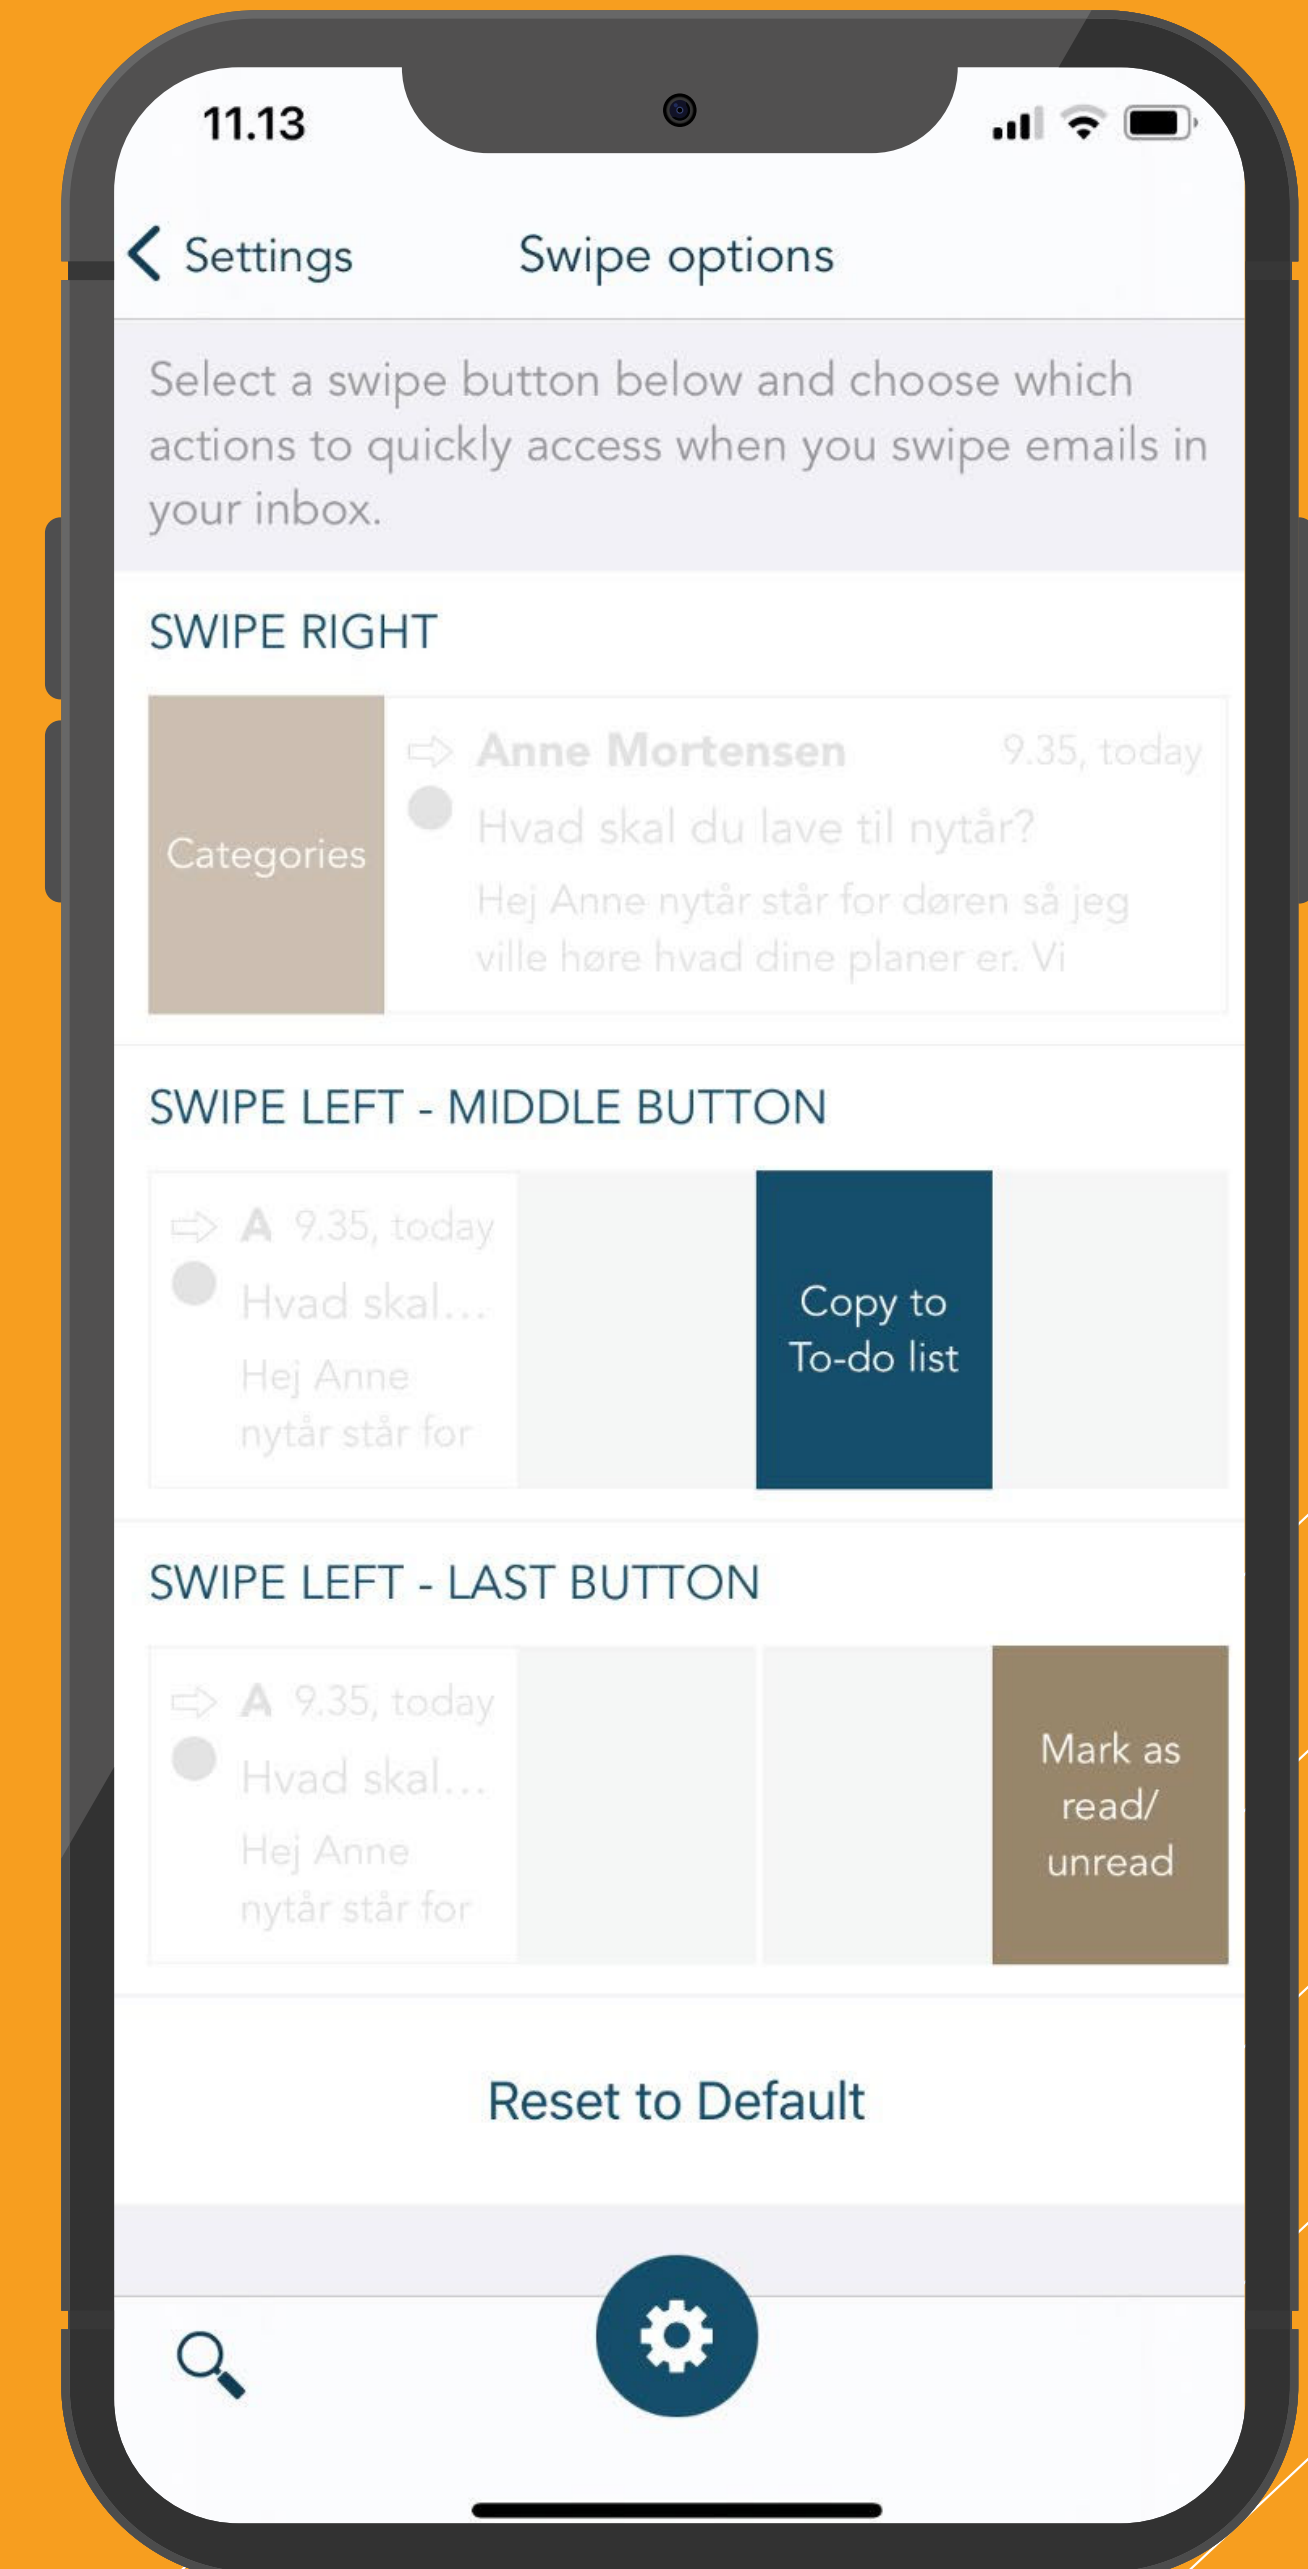

With the reMARK app, users enjoy far more efficient workflows that support even the busiest days in the maritime industry. The experience is highly customizable through the settings page you see on the left.

Swipe Options

Create your own shortcuts with reMARK's swipe options. Users save time and increase efficiency when completing tasks with this essential feature.

reMARK SAVES HOURS EACH DAY

"In the past, when I would try to update colleagues about the positions of 50 ships, it would take me about 3-4 hours. Now it takes me less than an hour."

“
