- AI

Best In-Class Features

- Folders
- Search
- Mobile App
- API
- Short-Keys
- Workflows
- Templates

Our Options

— reMARK On-Premises

Our on-premises offering can be set-up with a timely and detailed implementation process, allowing for a seamless transition and deployment of your email solution. We can install it on the hardware of your choice, to insure you have full control of the installation. We develop a plan tailored to your business needs while ensuring your company has access to the latest feature enhancements, timely updates, and system improvements.

— reMARK Cloud

reMARK's SaaS offering enables a competitive advantage for companies seeking a flexible and scalable email collaboration solution. Even though this version of reMARK is connected to the cloud and is fully managed by Nordic IT, it maintains the client program that you know from previous versions. Allowing for reduced costs, increased uptime, and reduced maintenance, users maintain access to their favorite reMARK features in our beloved client version while benefiting from seamless implementation.

Get Started Now

Answer emails faster. Cut Costs. Drive Revenue. With cloud and on-premise options, Nordic IT can take your organization to the next level. Talk to our team to discuss which option is best or how to get started with your preferred email method today!
