

## NORDIC IT'S REMARK PARTNERSHIPS & INTEGRATIONS

At Nordic IT, our valued partnerships and integrations within the maritime sector demonstrate our commitment to ongoing innovation and continuous growth. Our network allows us to continually adapt the reMARK email platform, ensuring it meets the complex and evolving needs of our maritime customers.

By collaborating with Nordic IT's reMARK partnerships and our integrations, your maritime communications will benefit from enhanced collaboration, greater operational efficiency, streamlined processes, advanced automation, and stronger relationships. API connectivity with various platforms and increased functionality will further elevate these improvements.

### WT International

Our partnership with W.T. International, based locally in the Netherlands, caters to the support requirements of our diverse customer base. Specializing in computer networks, privacy, and systems maintenance and innovation, they extend their expertise to Nordic IT to ensure alignment with regulatory compliance requirements.

### ZERONORTH

#### ZeroNorth

This partnership with ZeroNorth marks a new era of unprecedented data interconnectivity and automated analysis for improved operational efficiency. reMARK users gain access to essential information, such as cargo opportunities and vessel positions, which aids in making informed operational decisions.

### Veson Nautical

Veson Nautical (Veson) is the leading global provider of maritime freight management solutions. They offer a comprehensive suite designed to drive efficiency and productivity in the global shipping industry. Veson's offerings include advanced marine contract and vessel information management, as well as, robust data analytics tools.

### Gatship

Our partnership with Gatship empowers Nordic IT to support agencies more effectively, managing port calls and client interactions. This collaboration enhances connectivity across the maritime industry, allowing all stakeholders to leverage reMARK for streamlined communication and reinforcing our commitment to strengthening industry relationships.

## reMARK API

At the core of our integration capabilities is the reMARK API, designed to empower the maritime shipping industry with custom application development for essential business processes. Utilizing a REST protocol, the API provides access to all reMARK features, enabling the creation of tailored applications that enhance efficiency and meet specific business needs.

## complexio

### Complexio

Complexio develops advanced AI models that deliver actionable insights for maritime shipping companies from their data, effortlessly integrating with existing systems. Their cutting-edge technology offers real-time, tailored solutions designed to meet the industry's specific needs.

## safeonline

### Safe Online

Safe Online, a Danish leader in personal data management, provides a suite of SaaS tools that streamline the discovery, handling, and secure sharing of sensitive information. Their solutions simplify the complexities of data management, enhancing efficiency and making GDPR compliance more accessible for businesses.

### Trigonal

Trigonal delivers state-of-the-art software solutions for shipbroking and derivatives trading. By integrating with reMARK, their software enhances workflow communication and offers deeper insights, streamlining users' operations for greater efficiency.

### Microsoft 365

Through the integration with Microsoft 365, Nordic IT's reMARK offers a fully embedded experience within Microsoft 365. This integration facilitates displaying calendar data and meetings directly within a reMARK user's account, promoting efficient schedule management within the reMARK platform.
